Eric Vazquez

New York, NY| evazquez0792@gmail.com | Linkedin | Github

IT specialist with a background in software and cloud infrastructure troubleshooting; looking for technical roles in an innovative environment that also promotes growth and career advancement.

Technical Skills

Java, Spring Boot, PostgreSQL, HTML, CSS, JavaScript, Vue.js, Responsive Design, IntelliJ, Git, Unit testing(Junit), JSON, JDBC, Table Design, MongoDB, Cloud Concepts, Linux, Cyber Security, Ticketing Systems, Networking Principles, JIRA

Technical Experience/Projects

ContactNest – Crafted a full stack app to manage connections using Spring, Vue and deployed on AWS EC2 and S3

Tenmo – Developed a back-end portion of a money share app using Java and PostgreSQL. Followed MVC design and built a REST API functional with postman testing.

TurnTable – Created a website which utilized HTML, CSS, Vue.js, Spring Boot, and PostgreSQL. This website allows users to create an event, assign DJs and add songs to a playlist using the Spotify API.

Pipeline – Full stack application for maintenance to track service requests. Built using Java spring, Mongo and React.

Quiz Application – Designed ER diagram to plan PostgreSQL tables for a Java CLI quiz. JDBC was used to issue queries.

Education

Tech Elevator | October 2022 – February 2023
Successfully completed a 14-week full-stack coding bootcamp learning how to create dynamic web-based software systems using Java and providing 700+ hours of development education and application.

Montclair State University, BS Information Technology, Minor Computer Science

Bergen Community College, Associate of Science

Certifications: Network+, Security+, AZ-900, MS-900, Box Certified Professional, AWS Cloud Practitioner Foundation

Professional Experience

Express Scripts through Brooksource| Jr Software Engineer | May 2023 – Current
- Configured automated production validation Jenkins jobs using Java to ensure accuracy during new releases
- Implemented Java and OpenCSV features for an automated migration API in an Agile process
- Utilized Java Spring Boot and SQL queries to extract data from DB2/mainframe systems and store it in MongoDB as part of the company's effort for data modernization.
- Updated workplace documentation for fellow employees on onboarding and work processes through confluence.

WithumSmith & Brown | Solutions Specialist | October 2020-October 2022
- Performed the Installation and updates of firm applications within Azure Virtual Desktop used by 1500 end users.
- Researched software and tested it to provide solutions for end-user needs, working within agile sprints
- Worked with vendors as a liaison to install critical updates to firm applications on servers
- Created technical documentation for both client and internal use

WithumSmith & Brown | Service Technician | April 2018 – July 2019
- Diagnosed and resolved 1st and 2nd level hardware and software issues, on-site and remotely for a user base of 1500 staff members
- Tested and provided QA for deployment of multiple firmwide upgrades to one of company's main software
- Achieved a 90% SLA finish rate on tickets acquired and a 4.94 out of 5 in customer satisfaction
